

NISHA RAJU

Software Engineer · React Native · Mobile & Web applications development
Hoshiarpur, India · +91 75268 62140 · nisharaju961@gmail.com · [linkedin.com/in/nisha-raju/](https://www.linkedin.com/in/nisha-raju/)

SUMMARY

Software Engineer with 2+ years shipping production React Native apps across iOS and Android in healthcare, social, and fintech domains. Skilled in TypeScript, Redux Toolkit, Firebase, and CI/CD with Expo/EAS. Experienced in AI API integration and real-time services.

TECHNICAL SKILLS

Mobile: React Native, Expo, EAS Build, Reanimated, Gesture Handler, iOS & Android, Testflight, Play console

Languages & Frontend: TypeScript, JavaScript (js), React.js, Next.js, Tailwind CSS, HTML, CSS

State & Backend: Redux Toolkit, Redux Saga, Context API, Firebase, REST APIs.

Integrations: OpenAI API, SignalR, Stream Chat, Google Maps API, Mixpanel, Websockets

DevOps & Tools: GitHub Actions, EAS Build, Expo OTA, Git, Figma, i18next (RTL/LTR)

AI Tools: Cursor, Github copilot

WORK EXPERIENCE

Software Engineer · Explore Crest *Apr 2025 – Present | Canada · Remote*

- Architected scalable React Native features across iOS and Android, reducing crash rate and improving cross-platform stability in production.
- Integrated REST APIs and SignalR real-time services, enabling low-latency synchronized experiences for active users.
- Optimised Redux Toolkit state management, resolving critical performance bottlenecks and improving screen load times.
- Implemented CI/CD pipelines with GitHub Actions + EAS Build, enabling OTA updates and faster release cycles.

Software Engineer · Diligent Infotech Pvt. Ltd. *Feb 2023 – Aug 2024 | Hoshiarpur, India*

- Boosted data processing speed by 40% by re-engineering core algorithms across multiple React Native apps.
- Refactored legacy React Native codebase, reducing bug reports by 20% and improving maintainability.
- Delivered full multilingual support (EN, AR, RU, HE) with complete RTL/LTR layout handling using i18next.

KEY PROJECTS

Drifthome ([iOS](#) / [Android](#)) · *React Native · Reanimated · Gesture Handler · SignalR · Google Maps · Next.js*

- Property discovery lacked engagement; users had no intuitive way to browse listings or communicate with hosts in real time.
- Built Tinder-style swipe property browsing with custom Reanimated animations and integrated SignalR real-time chat — boosting user engagement 80% and interaction rates 90%.

Squad Accountability Tracker ([link](#)) · *React Native · Firebase · OpenAI API · Stream Chat*

- Existing accountability apps lacked intelligent feedback loops and seamless group communication, reducing long-term user commitment.
- Developed AI-powered accountability features using OpenAI API; integrated Stream Chat for real-time group messaging and Firebase for cross-device sync — improving goal completion rates.

Ecoageing ([iOS](#) / [Android](#)) · *React Native · Firebase · i18next · Push Notifications*

- Climate education platforms struggled with low retention and poor accessibility across language barriers and demographics.
- Built a gamified multilingual platform with quizzes, badges, push notifications, and i18next localization — achieving 80% user retention improvement.

Therapay — Merchant & Admin Portal ([link](#)) · *React.js · Next.js · Tailwind CSS*

- Merchant teams relied on fragmented workflows with no unified view of payment operations or role-based access control.
- Developed a role-based payment dashboard with secure approval workflows and real-time data handling — improving operational efficiency for merchant and admin teams.

EDUCATION

B.Tech, Computer Science · Rayat Bahra Institute of Engineering & Nano Technology, Punjab 2019 – 2023
